

OMEGA Nail-Seal Tape ESK / DSK

A bitumen tape, adhesive on one or both sides, that is attached along the full length between the diffusive roof underlay and the counter-batten. It prevents ingress of rainwater and guarantees optimum wind-tightness of the construction. Tested for protection from rain by the Austrian Wood Research Association, (Holzforschung Austria Order no. 203/2003/2 T/HH).

FIELD OF APPLICATION

- a seal for nails and screws below the counter battens

ADVANTAGES

- easy to use
- good adhesion on wood and underlays
- good elastic properties

GUIDELINES FOR USE OF OMEGA Nail-Seal Tape ESK / DSK

Attach OMEGA Nail Seal Tape to the roof sheeting directly beneath the counter-batten.

Glue the OMEGA DSK nail-seal tape directly to the lower side of the counter battens, then position and fix the batten.

The sealing tape encloses the nail completely and achieves a 100% sealed penetration point! See Guidelines for OMEGA Roof Underlay

The standards according to ÖNORM B 4119 and/or ZVDH (Central Association of German Roofers) must be observed.
